### **May 20, 2010: Airstreams Renewables, Inc. and ENSA Access & Rescue Inc. join forces to create the Total Training Solution.**

Airstreams Renewables, Inc -- leaders in career safety and technical training and ENSA Access & Rescue, Inc. -- a leader in wind energy specific height/rescue and confined space training -- today announced that the two companies have entered into an agreement for Airstreams Renewables, Inc. to acquire the ENSA Access & Rescue platform, creating the most comprehensive and flexible total training solution available in the market today. "This merger represents a strategic move for both Airstreams and ENSA, to leverage each other's core strengths and deliver increased value to the markets in which we serve," said Jeff Duff, Airstreams President and COO. "Our customers require flexible training solutions that address the full range of required training through competitive delivery options. This merger will enable the Airstreams/ENSA platform to meet the industry demands given the forecasted growth expected in wind, while maintaining the quality of our training programs and services that our customers have come to expect."

The deal is expected to close by July 1<sup>st</sup> positioning ENSA as a wholly owned subsidiary of Airstreams Renewables, Inc. Under the terms of the agreement, ENSA will continue to service on-site training throughout North America while leveraging Airstreams existing total training solution centers located in Tehachapi, CA and Gary, SD.

"For training to be truly effective it must meet both the regulator's and industry guidelines and the specific needs of each customer's unique situation," commented Nicholas Jones, the CEO of ENSA. "Increasingly, this takes resources, bandwidth, and highly trained specialists able to service the entire training spectrum and significant wind specific knowledge and experience. Our customers can now choose comprehensive training solutions on-site, using our new mobile tower or take advantage of our existing total training centers."

#### **About Airstreams**

Airstreams Renewables, Inc. (ARI) offers safety and technical training solutions throughout the renewable energy sector that are focused on core skill sets designed to meet industry standard expectations for both entry level and advanced construction and service technicians. Courses are instructed by industry experts with over 200 years of combined experience in the wind and renewable energy industry.
