Airstreams Awarded Three Year Contract with Los Angeles Department of Water and Power (LADWP)

Airstreams, LLC of Tehachapi California has been awarded a 3 year contract to supply technical and training services with The Los Angeles Department of Water and Power.

Airstreams and its affiliates will provide wind turbine technical oversight and training for the Operations and Maintenance staff and the department's first wind turbine power facility. The project, known as The Pine Tree Wind Park, will consist of eighty (80) 1.5-megawatt wind turbine generators. The project is located in the Pine Tree and Jawbone Canyons in the southern Sierra Mountains of Kern County, California.

"This is an exciting time for our company and the wind industry. We look forward to assisting the largest municipally-owned utility in the nation as they transition into wind energy." said Airstreams President Dave Schulgen.

Airstreams is a privately owned wind energy firm specializing in technical consulting and training. Since 2003, Airstreams has continued to establish itself as one of the most specialized firms of its kind in North America.
