### Graduate Profile

I live in Bakersfield and was really concerned about the economy and my ability to sustain my current income. I contacted AIRSTREAMS because I heard they had an Accelerated program that would enable me to get into Renewable energy/wind and I needed to make a move quickly. The 20-Day program was tough but before I realized it, I was graduating and really happy I would be able to start my new career. The Airstreams career services people were a valuable resource in helping me modify my resume and identifying potential wind companies that were hiring. The industry connections that Airstreams has made all the difference. I was elated that I actually got an interview 7 days after graduating. Then to my surprise, I got hired by one of the largest wind companies in the industry, as a commissioning technician! I am amazed that I could go through training and have a new job in such a short timeframe. Thanks AIRSTREAMS for Providing me with great training and my new career...I would not have had this opportunity if it wasn't for you!

Rick Baze, Bakersfield California
