

VETERAN

PROFILES OF SUCCESS

Darron Gullette

U.S. Army

Hiring Company: **Performance Technologies, L.L.C.**

Class: Industrial Safety

Graduated 8/12/2011

When asked what he'd be doing if he hadn't attended Airstreams/ARI Technical Institute, Darron Gullet stated *"I would be seeking employment"*. But thanks to Thomas Cole, the Director of Admissions and Recruiting at ARI and with cooperation from U.S. Vets, a veteran's assistance group offering tuition, lodging, travel, and other expenses for work-focused training, Mr. Gullette is no longer seeking employment!

From the first day Mr. Gullette arrived at ARI on 8/1/11, his instructors and classmates knew he was there for one purpose only; to gain the specific knowledge he would need to get a job that would lead to long-term employment. On 8/10/11, with the coordinated assistance of the ARI team, Darron interviewed with the 2nd largest natural gas and oil company in the U.S., Chesapeake Energy Corp. and showed the recruiter that he meant business. The recruiter said Darron was a perfect fit for their Performance Technologies Subsidiary and was excited to get him onboard!

Despite months of financial struggle and questions about his future, Darron's life had changed dramatically after taking the two-week accelerated Industrial Safety Course at ARI!

Darron is now looking forward to a life-long career in an occupation which will meet his financial needs comfortably, while providing consistent work and potential career growth well into the future! We're very excited to have played a small part in helping turn his life around so quickly. Nicely done, Darron!
